03

NANO GUARD
— SOLUTIONS —

Understanding Your Roof.

We inspect before we recommend.

Age

Granule retention

Flexibility

Water behavior

Flashing & details

Leaks & trouble spots

A **qualified roof** is a candidate. A **failing roof** is not.

GoNano Authorized Reseller & Installer • NuRoof Certified Contractor

Residential Roof Preservation Pitchbook

04

Why Roofs Fail Early in Southern Ontario.

Weather turns normal aging into **early failure**.

UV exposure

Freeze-thaw
cycles

Wind & hail

Rain &
moisture

Shingles dry out, lose granules, and become **vulnerable faster** than most homeowners expect.

NANO GUARD
— SOLUTIONS —

RHScore: Preserve, Monitor, or Replace?

Your roof is scored on age, granule retention, flexibility, water behavior, and visible roof distress.

The goal is simple:
preserve the roof while
it still qualifies.

PRESERVE

Score 70+

Roof in strong condition.
Extend life with
NuRoof protection.

MONITOR

Score 40–69

Early signs of wear.
Monitor and plan
maintenance.

REPLACE

Score 0–39

High risk of failure.
Replacement is the
smart investment.

NANO GUARD
— SOLUTIONS —

Your 4 Real Options.

01

Bio-oil rejuvenation

~\$1.15/sq ft

Lowest upfront cost

02

**NanoGuard
NuRoof Extreme**

~\$2.00/sq ft

Advanced preservation +
weather protection

03

Overlay roof

Lower-cost 'new roof' option

04

**Full tear-off
replacement**

Complete roof-system reset

These options are not equivalent. Compare scope, risk, and outcome — not just price.

GoNano Authorized Reseller & Installer • NuRoof Certified Contractor

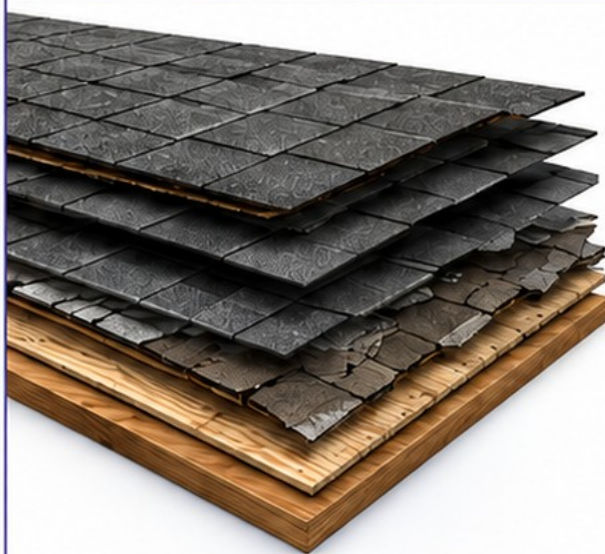

Residential Roof Preservation Pitchbook

07

Not Every 'New Roof' Quote Is the Same.

✗ Cheap overlay / recover

- ✗ Existing shingles stay
- ✗ Hidden conditions stay hidden
- ✗ Adds another roof layer
- ✗ Usually lower upfront cost

✓ Proper full tear-off

- ✓ Roof removed to the deck
- ✓ Deck can be inspected
- ✓ New underlayment & protection
- ✓ True roof-system reset

Before comparing price, compare what is actually being replaced.

Marketing Sounds Great. Warranties Tell the Truth.

Many roofing warranties

- ✓ Often prorated
- ✓ Often material-focused
- ✓ Labour may be separate

Many low-cost treatment warranties

- ✓ Often shorter-term
- ✓ Often limited or prorated
- ✓ Ask what is actually covered

Before you sign, ask:

- ✓ Is it prorated?
- ✓ Is labour included?
- ✓ Is it overlay or tear-off?
- ✓ What happens if performance fails?

The best warranty is the one you **understand before you buy.**

NANO GUARD
— SOLUTIONS —

Why NanoGuard Stands Apart.

Revive + **Fortify** = NuRoof Extreme Weather Protection

Hydrophobic

Repels water.
Prevents absorption.

Breathable

Allows moisture
to escape.

Advanced penetration

Nano-engineered for
deep, lasting protection.

UL / ASTM backed testing

Proven performance.
Trusted standards.

Designed to preserve qualified roofs before replacement becomes the only option.

VS

Oil-Based

Sits on the surface.
Washes off.
Short-lived.

NanoGuard Treatment

Penetrates deep.
Bonds at the molecular level.
Long-lasting protection.
